Online 2 Set 3
July 2023 CSE 102
Arrays & Strings

Full Marks: 10 Duration: 25min

Finding the largest word from a sentence.

Problem Statement:

Write a C program that takes a string as input then print the largest word from the string. The words of the input string are separated by spaces.
Note: The string can have at most 1000 characters

Example:
Input:
It is a string with a smallest and a largest word.

Expected Output :
The largest word is 'smallest'

Restrictions:

You can only use `strlen` and `strcpy` functions from the `string.h` library .

Submission Guidelines:

- ➔ Solve the problem and rename the file as `<your_id>.c` (Example: student with ID `2205999` will rename it as `2205999.c`).
- ➔ Then upload the .c file in Moodle.
- ➔ **Do not copy from your classmate. In this case both of you will get -100%.**
