Time: 25 Minutes **Marks: 10**

Section B1 — Reward Immediate Extra Moves

Modify your existing search so that earning an extra move receives an additional heuristic reward.

Use:
$H_{new} = H_{old} + 10E$

Where:

- E = 1 if the move results in an extra turn for the same player.
- E = 0 otherwise.

Requirements:

1. When evaluating a possible move, determine whether that move earns an extra turn.
2. Include the reward in the evaluation.

The program must print:

- Selected Move
- Extra Move Earned: Yes/No
- Evaluation Value

Section B2 — Reward Capturing Moves
